EDUCATION

KIET Group of Institutions

B.Tech in Information Technology

CGPA: 8.17 | Coursework: Data Structures, Algorithms, OOP, Operating Systems, DBMS

2024 – 2028

Ghaziabad, India

PROFESSIONAL SUMMARY

Android Developer specializing in building scalable and high-performance mobile applications using Kotlin and Jetpack Compose. Experienced in MVVM, Clean Architecture, Hilt, and REST API integration, with a strong focus on clean UI/UX and smooth user experience. Built 3 production-level Android apps and solved 300+ DSA problems. Seeking an Android Developer Internship to contribute to real-world mobile products.

TECHNICAL SKILLS

Languages: Kotlin, Java, C++, Python

Android SDK & Jetpack: Jetpack Compose, ViewModel, LiveData, StateFlow, Coroutines, Kotlin Flow, Navigation Compose, Room Database, WorkManager, DataStore

Architecture & Patterns: MVVM, Clean Architecture, Repository Pattern, Dependency Injection (Hilt), UI State Management

UI & Design: Material Design 3, Responsive Layouts, Custom Composables, Theming, Dark Mode Support

Networking & Backend: Retrofit, REST APIs, JSON Parsing, Firebase Authentication, Firebase Realtime Database

Testing & Debugging: Unit Testing, Android Logcat, Android Profiler, Crash Debugging

Developer Tools: Android Studio, Git, GitHub, Gradle, APK Build & Optimization

Cloud: AWS Certified Cloud Practitioner, AWS Certified AI Practitioner

PROJECTS

Kometo — Food Delivery Android Application

[View Project →](#)

Kotlin · Jetpack Compose · Clean Architecture · Hilt · Firebase Auth · Material Design 3

- Developed a Zomato-inspired Android application with 8+ screens using Jetpack Compose, implementing type-safe navigation and reusable UI components for scalability.
- Integrated Firebase Authentication (Google Sign-In + Email) with persistent user sessions, ensuring reliable login experience across app restarts.
- Applied Clean Architecture with Hilt-based dependency injection to separate data, domain, and UI layers, improving maintainability and testability.

MyRecipe — Recipe Browser Android Application

[View Project →](#)

Kotlin · Jetpack Compose · Retrofit · REST API · Spoonacular API

- Integrated Spoonacular REST API using Retrofit with structured error handling and JSON parsing across multiple endpoints.
- Designed features including recipe search, favorites, and an automated shopping list that aggregates ingredients from saved recipes.
- Implemented MVVM architecture to manage UI state effectively and ensure a responsive and maintainable code-base.

MyWishlist — Offline Wishlist Manager

[View Project →](#)

Kotlin · Jetpack Compose · Room Database · MVVM · Kotlin Flow

- Built a fully offline Android application using Room Database, supporting filtering, tagging, and search without network dependency.
- Implemented reactive UI using Kotlin Flow and StateFlow to deliver real-time updates without manual refresh.
- Optimized local data queries to ensure smooth and fast search performance across large datasets.

PROBLEM SOLVING & ACHIEVEMENTS

- Solved **300+ DSA problems** on LeetCode, maintaining a 100+ day coding streak.
- National-level participant in Bharatiya Antariksh Hackathon 2025 organised by ISRO & Hack2Skill.

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services
- AWS Certified AI Practitioner — Amazon Web Services
- Model United Nations (MUN) Participant — KIET Group of Institutions
